Download white papers and product collateral, and view on-demand webinars.

Author: jefferytaylor Subject: Sticky Note Date: 2/25/12 11:27:49 PM -05'00'

In my opinion, the hover text should match the label under the icon.

For instance, the hover text for the Analyst Reports icon and the hyperlink below it reads "Report Analyst icon". I think the hover text for both the icon and the hyperlink should read "Analyst Reports".

The hover text for the others should be changed accordingly:

Report Analyst icon -> Analyst Reports

Product Collateral icon -> Product Collateral

Case Studies icon -> Case Studies

White Papers icon -> White Papers

Video icon -> Videos

Webinars icon -> Webinars

managed in order to satisfy corporate security, compliance and other requirements. Learn more about the trend toward consumerized IT and recommendations for addressing it.

Embracing and Empowering the Consumerization of IT

Employees' selection and use of hardware and software platforms – made independently from and without IT's blessing – is becoming increasingly common in organizations of all sizes. This so-called "consumerization of IT" is increasing. In this report from Osterman Research, you'll learn about the consumerization of IT and how you can embrace it, turn it into a competitive advantage, integrate IT-sanctioned and consumer technologies, and manage them in a cohesive framework.

How to manage email attachments

Still using email for sending large attachments? Read this white paper from Osterman Research to learn why implementing a secure email attachment management solution such as Workstream can help you enhance security and productivity, and dramatically improve your email and network performance.

Important Issues to Consider Before Migrating to a New Version of Exchange WP

In this white paper from Osterman Research, find out how to improve mail server performance and boost user productivity by integrating a secure, cloud-based file sharing solution into your Microsoft Exchange migration. By incorporating file-sharing services into your migration plans, you can offload IT staff from time-consuming mail server management, plus improve work processes and user satisfaction.

Microsoft Exchange

When planning for the migration to on-premise Exchange 2010, decision makers should consider where else they could make improvements to their infrastructure, their work processes and overall corporate resiliency by applying cloud-based technologies where it makes sense to do so. In this white paper, we attempt to make the case for considering the many advantages of implementing

cloud-based file transfer during the Exchange 2010 migration process.

Why You Need a Better Way to Manage Email Attachments [Download](#)

Find out how to reduce costs and improve mail reliability by moving file sharing to the cloud. In a white paper from Osterman Research, **Why You Need a Better Way to Manage Email Attachments**, you'll learn why offloading email servers is key to maintaining secure and reliable communications.

Business Content Collaboration: How Burr & Forman Increased Enterprise Performance with Workstream [Watch](#)

No business knows more than a law firm about handling large quantities of documents. Burr & Forman, a large law practice based in the southeast U.S., faced a crisis - sending multiple document files simultaneously was causing its mail servers to choke. The firm needed technology that could not only handle large document volumes, but would be secure and easy to use. David Michel, Burr & Forman CIO, discovered a solution in Workstream that enables his organization to send, receive, and track sensitive files in the cloud. View this on-demand webcast to learn how Burr & Forman improved IT and business productivity, improved client interactions, and what they considered for security, end user adoption, and integration.

Forrester analyst Ted Schadler on mobile content sharing [Watch](#)

Join us for **How Mobility is Driving the Need for Cloud-Based Content Sharing and Collaboration**, an exclusive webinar featuring Forrester Analyst Ted Schadler. Learn how employees can share information and collaborate from anywhere, with applications that work with cloud-based services.

The Future of Work: Collaborating Around Business Content [Watch](#)

Cloud-based document collaboration is gaining momentum, as companies need to support their mobile, distributed work teams that must securely share information anywhere. Enterprises and smaller businesses alike are seeing productivity gains and cost savings via easy-to-use and -deploy tools that integrate existing communications, processes and content without the heavy implementation burden of previous content management solutions. Cloud-based services are emerging as innovation leaders in this space. View an on-demand webinar with GigaOM Pro and learn more about the "The Future of Work: Collaborating Around Business Content."

Business Content Collaboration: How Burr & Forman Increased Enterprise Performance with Workstream

Watch

No business knows more than a law firm about handling large quantities of documents. Burr & Forman, a large law practice based in the southeast US, faced a crisis - sending multiple document files simultaneously was causing its mail servers to choke. The firm needed technology that could not only handle large document volumes, but would be secure and easy to use. David Michel, Burr & Forman CIO, discovered a solution in Workstream that enables his organization to send, receive, and track sensitive files in the cloud. View this on-demand [webcast](#) to learn how Burr & Forman improved IT and business productivity, improved client interactions, and what they considered for security, end user adoption, and integration.

Join us for **How Mobility is Driving the Need for Cloud-Based Content Sharing and Collaboration**, an exclusive webinar featuring Forrester Analyst Ted Schadler. Learn how employees can share information and collaborate from anywhere, with applications that work with cloud-based services.

The Future of Work: Collaborating Around Business Content

Watch

Cloud-based document collaboration is gaining momentum, as companies need to support their mobile, distributed work teams that must securely share information anywhere. Enterprises and smaller businesses alike are seeing productivity gains and cost savings via easy-to-use and -deploy tools that integrate existing communications, processes and content without the heavy implementation burden of previous content management solutions. Cloud-based services are emerging as innovation leaders in this space. View an on-demand webinar with GigaOM Pro and learn more about the "The Future of Work: Collaborating Around Business Content."
